Hiace Gearbox Problems

Q : Dear Hanip, would like to know if you guys service Toyota Hiace. I drive a Hiace with some transmission issues – The auto gear seems to take ages to engage and I probably will have to drop by your workshop. What are the charges like for commercial vehicles? Selvarajoo

A : Dear Mr Selvarajoo, from what I can garner you either have low transmission fluid or your transmission has worn out badly. Either way, no worries I can fix these minor issues for you. My workshop is located at: Blk 1062 Eunos Avenue 4, # 01-217, just next to Singpost Paya Lebar. To give you a quotation now is difficult as I need to really find the root of your transmission problem. Anyway there will be no charges at all from me when I do the checking, it's free of charge!
